Safety and Security

Safety and security are our top priorities. We maintain a safe environment through diligent monitoring and proactive safety measures. Our campus is equipped with modern security systems and staffed by trained professionals who ensure the well-being of all students and staff. Access controls and emergency protocols are in place to handle any situation swiftly and effectively. We are dedicated to providing a secure and supportive environment where every student can thrive academically and socially.

Student Health

Our school regularly conducts health check-ups to ensure the overall well-being of students. As part of these health check-ups, eye tests are conducted to detect vision problems at an early stage. These regular medical examinations help in maintaining students' physical and mental health. The school believes that continuous health monitoring is essential for the healthy growth of children. Through regular health check-ups, the school ensures a safe and healthy learning environment for all students.

Ensuring water purity

Our school ensures the purity of drinking water by using a modern water purification system. The water purifier is regularly maintained to provide clean and safe drinking water to all students. Periodic water quality checks are conducted to maintain high hygiene standards. Safe drinking water helps in protecting students from water-borne diseases. The school is committed to providing a healthy and safe environment through pure and hygienic drinking water.

Camera Surveillance

Camera surveillance in the school campus helps us ensure the safety of students, staff, and visitors. It allows school authorities to monitor activities in key areas such as entrances, corridors, and playgrounds. Surveillance footage can help prevent bullying, vandalism, and other unwanted behaviours. Cameras provide valuable evidence during investigations of incidents that occur on school grounds. Properly managed camera systems improve security while also protecting the privacy of students.
